Freely MoVI XL Quick Release Kit

MöVI XL quick release kit allows users to quickly mount / dismount the gimbal from a variety of platforms. The male portion of the quick release mounts to MöVI XL, and the female portion mounts to whatever platform you intend to mount MöVI XL to (Car, boat, Technocrane, Jib, Horse, Camel). The quick release features a clamping dovetail design with safety stops on both sides. Users insert the quick release, hear a loud ‘click’ to let them know the quick release is engaged, then activate the clamp to ensure the gimbal is securely mounted. Freely has tested the quick release design in the most demanding situations (RZR off road at 80mph with no issues)

Features

- Allows users to quickly mount / dismount gimbal (sub 1 minute changeover)
- Dovetail design with clamp
- Safety buttons to ensure no accidental disconnections
- 6061 T6 Aluminum lightweight design
- Can be mounted on a variety of support platforms
- 6061-T6 black anodized lightweight aluminum design
- Helicoils for increased threaded hole longevity and robustness

In the box

- Gimbal Quick Release XL
- 6x Bolt M6 x 12 SHCS SS
