Freefly MoVI XL to Mitchell Adapter

MōVI XL features a 6 bolt pattern allowing users to mount the gimbal to a variety of devices. The MōVI XL to Mitchell Adapter adapts the 6 bolt pattern to a standard Mitchell Mount. This can be used with or without the MōVI XL quick release. Freefly sets our gimbals up to use the Quick Release system as it allows for much faster changeover than bolted or Mitchell mount. When we need to mount to something with a Mitchell mount we simply attach the Mitchell Mount to our Quick Release.
