Producent	NANLITE

Opis produktu

NanLite Compac series studio LED panels combine a slim profile with impressive brightness to create lighting similar to large softboxes but at a fraction of the size. This space-saving design makes them an ideal option for lighting portraits, interviews, headshots, live streaming, food photography, vlogging, product photography and more. With Compac series LEDs you can quickly achieve beautiful, studio-quality results without adding plastic filters or cloth diffusion. Rear controls enable you to dial in brightness from 0-100% and color temperature is set to a constant 5600K for easy compatibility with other daylight balanced light sources, photographic strobes and camera white balance presets.

This Kit, which was specifically designed for Reproduction , but of course can also be used for other photographic applications and is ideal for digital photography.

2 pcs Compac100 2 pcs Light Stand L288 1 pcs NG-066 Product Photography Table
