NANLITE FORZA 200

Cena brutto	3 450,00 zł
Cena netto	2 804,88 zł
Dostępność	Dostępny w sprzedaży - wysyłka 1-5 dni
Producent	NANLITE

Opis produktu

Forza 200 LED Monolight from NanLite has a daylight color temperature of 5600K with a high CRI/TLCI of 98/95 indicating advanced accuracy in color rendition. The 21 x 13 x 30 cm fixture weighs just 1,78 kg, making it a welcome addition to your kit, while its reflector allows it to output 34,890 lux at 1 meter'.

The Forza 200 is cooled by a quiet fan that can be turned off - a real asset in sound-sensitive environments. It's also dimmable from 0 to 100% and while you can adjust the light intensity locally on the fixture, you can also do it remotely from a console via DMX, or wirelessly from an optional transmitter thanks to the head's built-in 2.4 GHz technology. Another great feature is its 11 special effects, including INT Loop, Flash, Pulse, Storm, TV, Paparazzi, Candle/Fire, Bad Bulb, Fireworks, Explosion, and Welding.

Another benefit is the Forza 200's AC/DC power options. The light is ready for worldwide use thanks to its 110 to 240 VAC power supply, but it can also run on optional 14.8V V-mount batteries when mains current is unavailable. The Forza 200 ships with a yoke and 16mm receiver that accepts industry-standard light stands.

The control unit is separate from the fixture head, greatly reducing the weight of the head without limiting output power. With the included light stand clamp it is easy to mount the control unit or have it freestanding. The Forza 200 has intuitive on-board controls or can be wirelessly controlled via 2.4 GHz or DMX.

Upgraded Practical Lighting Effects

At the touch of a button, you can simulate 11 different practical lighting effects - INT Loop, Flash, Pulse, Storm, TV, Paparazzi, Candle/Fire, Bad Bulb, Fireworks, Explosion, and Welding. All of these are designed to enhance your work and save you time creating complex lighting scenarios.

Endless Light Shaping Possibilities

The Forza 200's mount allows you to use all Forza 200 modifiers. An optional Bowens adapter will allow you to attach standard Bowens modifiers making the Forza compatible with a massive selection of light-shapers, including but not limited to, the NanLites line of softboxes and umbrellas.

Power Anywhere

Optimized for use in the studio or on location, the Forza 200 can run with either the included AC adapter or an optional V-mount battery. This allows you to operate the fixture in any location regardless of power availability.

The Forza 200 has a USB port to support firmware updates, which keeps the light open to future possibilities.

- Color Temperature 5600K
- Color Accuracy Standard CRI 98
- TLCI 97
- Cooling System Fan
- Dimming 0 to 100%
- Photometrics 5600K: 306.3 fc / 3297 lux at 3 m

-
- Fixture Weight 1.78 kg
 - Remote Control Type DMX, Proprietary Wireless
 - Power Source AC Adapter, External Battery
 - Max Power Consumption 200 W

****In the Box: ****

- Nanlite Forza 200 Daylight LED Monolight
- Light Head
- Control Unit
- Power Adapter
- Power Cable
- Connecting Cable
- Protective Cap
- Reflector
- Light Stand Clamp
- Carrying Bag
