Opis produktu

We wanted to provide a versatile way to mount a phone, tablet, or other accessory alongside your cine monitor.

The L-shaped design with multiple mounting points allows you to create a variety of different configurations for shooting.

The NATO geometry lets you use quick release clamps to easily set up and remove your accessories. Whether it's a light, mic, mobile device, or something else, this thing lets you rig up your camera cockpit however you like.

Features

- L-shaped design for mounting a main monitor or tablet on the horizontal axis plus a phone clamp on the vertical axis
- Many 1/4-20 holes (9) for versatile mounting options
- ARRI pin standard anti-rotate holes/slots on (8) of the 1/4-20 mounting holes.
- Two anti-rotate spacers with 1/4"-20 captive screws included.
- Bracket profile is compatible with all NATO standard accessory clamps.
